

Handheld Confetti Launcher Rental — Instructions

You will need:

Handheld confetti launcher
Sleeves of Confetti (approx 2 per launch)
CO2 Cartridge (1 per launch)

Holding the launcher upright, open and pour your sleeve(s) of confetti into the launcher tube, some people choose to use a dowel to tamp the confetti down slightly to create a greater pressure when firing.

Once you are satisfied with the amount of confetti you have loaded, make sure the pull string is in the upright position. Screw your CO2 cartridge into the threaded hole. Grip the tube tightly with one hand making sure you are not pointing the launcher towards anybody and use the other hand to swiftly pull the launch cord downwards which will launch the confetti.

The CO2 cartridge will be very cold once used, please allow to warm up or use gloves to remove it (skin and cold metal don't mix)

You may re-load and use again immediately to achieve desired effect.

Thank you for renting a Kabuki Launcher from Archangel Fireworks Inc.
We hope your event is a huge success!
